- Quickly grasp the working process, company culture.

SUMMARY

I graduated from Greenwich University (Vietnam) with a major in Information Technology. I am currently developing my expertise through projects using ASP.NET Core, React.js and Flutter. In the near future, I want to perfect my programming skills and aim to contribute practical value to the business. In the future, I will become a project manager who brings high performance, innovates in technology solutions and accompanies the company on the path of sustainable development.

EXPERIENCE

THACO AUTO

11/2023 - Now

Full Stack Developer

Description: At Thaco Auto, I was assigned to develop production management software, including: frontend, backend and mobile. This software is built to help users manage the production process easily, and for leaders, they can grasp production data accurately and promptly. This is an important software in the digitization and automation process of Thaco Auto.

Technology: ReactJs, ASP .NET Core 3, Flutter, SQL Server.

Responsibilities:

- Perform functions on frontend, backend and mobile.
- Write documents related to software functions to make it easier to maintain or upgrade existing software functions later.
- Configure and deploy applications on IIS, ensuring stable operation on the server environment.

ST SOFTWARE COMPANY

01/04/2023 - 10/05/2023

Font-End Developer

Description: This application allows employees in the company to send their manager a request to take a day off. Employees who can create a request can edit the request's information. Management can accept or reject.

Technology: Reactjs, Bootstrap, NodeJS, MongoDB, Google Sheets API.

Responsibilities:

- Project team leader, analysis and evaluation of project requirements.
- Code user interface and logic for roles staff and manager in project.
